

EDUCATION

Nanyang Technological University, Singapore

Aug 2023 – May 2027

Bachelor of Science in Economics and Data Science

GPA:

- Year 1 Sem 1: 4.07
- Year 1 Sem 2: 4.23
- Year 2 Sem 1: 4.45 (Demonstrates progressive academic improvement)

ACADEMIC PROJECT

Nanyang Technological University, Singapore

Aug 2023 -

Python Data Science Team Project – Estimate football players' market values

- Developed machine learning model that leveraged random forest to estimate player positions by analysing players' attributes, achieving classification accuracy of 0.89 on test data.
- Applied multiple regression to predicting market values by analysing estimated positions, age and attributes of players to estimate market value, achieving R^2 score of 0.91

Designing Database for Investment Mobile App

- Designed ER diagram and normalised database schema to store investor data, financial goals, portfolios and transactions with 3NF normalisation.
- Implemented SQL queries for table creation and data insertion, and solved complex queries such as identifying investors who consistently top up their investments at the beginning of each month in 2024 (dollar-cost averaging) for at least one portfolio.

Market Analytics Excel Dashboard

- Designed a dynamic line chart displaying total website visits and bounces, automatically updating based on selected months.
- Constructed interactive bar charts for the top 10 country sources and top 10 traffic sources, with results adjusting dynamically in real time based on selected months.

WORK EXPERIENCES

Keat Hwa Secondary School

April 2023 – July 2023, May 2024 – July 2024

Substitute Computer Science Teacher

- Delivered engaging lessons to class of 30+ students, provided hands-on programming experiences in languages such as Python and C/C++.
- Designed one third of questions in mid-year examination paper.
- Advocated for establishment of computer science club, proposed idea to school administration and presented list of students interested in forming the club, assisted in supervising the club from time to time.

Hong Sheng Advanced Trading

Accountant

August 2022 – February 2023

- Utilised Excel VBA for bookkeeping, managing financial accounts, tracking sales, revenues, stock purchase and expenses.
- Gathering financial records and creating annual accounts for tax filling.

HACKATHON

Code with AI Hackathon – Top 10 Finalist

March 2025

- Utilised Bolt.new to develop an AI-powered platform called LeadNova that helps AI solution providers automatically discover and prioritize high-potential clients. It can automate client search by web scraping using Firecrawl, lead scoring, and outreach. The platform features AI-driven scoring system using factor like industry fit, revenue growth, and AI adoption to evaluate potential prospects. The platform also comes with its own AI chatbot that can provide company information upon request.
